MAIZE MILLING

We hereby present a comprehensive project outline and profile for the establishment of a state-of-the-art maize milling factory in Botswana. The primary objective of this initiative is to meet the dietary needs of local and neighboring country citizens for whom maize is a staple food.

PROJECT OVERVIEW: BUDGET ESTIMATES

Factory Construction

An estimated investment of $5 million will be allocated for the construction of the milling factory.

Mill Procurement

An estimated budget of $5 million is earmarked for the procurement of cutting-edge milling machinery to ensure efficient and high-capacity operations.

Plant Management Contract

We propose a management contract with technical partners to oversee the day-to-day operations of the mill, including the sourcing and supply of maize. This commitment aims to cater to the dietary requirements of local and neighboring country citizens, thereby generating foreign exchange revenue for Botswana. We propose, with our technical partners, to collaboratively develop a precise budget and detailed specifications for the factory and plant.

2024

NEXT STEPS

We are actively pursuing government endorsement for these impactful projects, poised to significantly boost youth employment, foreign currency earnings, and overall GDP. This crucial support will not only empower Watson and Fine, and our technical partners, but also serve as a catalyst for securing financial backing from both local financial institutions and well-capitalized pension funds. In a landscape where citizens of Botswana are seeking promising avenues for investment, what better way to shape their own future and contribute to the nation's prosperity?

We look forward to the opportunity to discuss this proposal in detail and address any questions or considerations you may have.
